Pharmacy Monitoring

## Standardized Compliance
& High-Value Asset Protection

Automated Monitoring Built for Pharmacies

The Sonicu monitoring system delivers ultra-precise, real-time monitoring solutions that protect high-value medications and biologics every step of the way, from manufacturing to distribution and delivery.

We've combined best-in-class hardware, expert services, and SoniCloud, our cloud-hosted software, to offer complete monitoring and compliance solutions all on one centralized platform with traceable documentation, data recovery, and IQ/OQ Validation.

View conditions from anywhere on your PC, tablet, or smartphone

$375 million dollars in assets protected and saved by smart alarms

- Safeguard your inventory with 24/7 monitoring and multi-tier mobile alerts that prevent costly excursions and product loss

- Automate compliance with solutions built to meet FDA, GMP, USP, and ISO standards, complete with audit-ready reports

- Scale with ease using a cloud-based platform that simplifies installation and connects your entire supply chain

Trusted by Thousands of Pharmacies Nationwide

Compounding | Specialty | Manufacturing | Transit | Retail

Sonicu delivers a unified platform purpose-built for pharmacy operations, eliminating manual processes with automated, real-time monitoring and reporting.

From strict FDA requirements and temperature-sensitive inventory to operational strain and patient safety, Sonicu helps you streamline your workflow, reduce risk, and stay compliant with confidence.

OhioHealth | Indiana University Health | Hendricks Regional Health | option care health | Piedmont HEALTHCARE

"Prior to using Sonicu, a state inspector would arrive for their random inspection and they would always ask to see the temperature logs. If a store had neglected to do that, we'd get a warning from the state board. Now we have a full-proof mechanism to prevent that with Sonicu."

# Discover Our Full Line of Monitoring Hardware

Precise monitoring starts with the right hardware.

From completely wireless temperature probes to advanced air pressure sensors and smart hubs, Sonicu offers a breadth of products including meters, sensors, and hubs—all engineered for accuracy, reliability, and seamless integration.

SoniShield View with Temperature, Humidity, & Pressure Monitoring for Compounding, Infusion, & Sterile Rooms

SoniShield Duo with Display (optional) and Glycol Sensor for Cold Storage & Transit Monitoring

When you combine our NIST Certified Sensors (calibrated in our ISO-accredited lab), flexible connectivity, and SoniCloud software, you get a proven platform trusted by pharmaceutical manufacturers, distributors, and compounding facilities.

- **Temperature Monitoring** for medical grade fridges, ultra-low freezers, and temperature cabinets

- **Air Pressure Monitoring** safeguards sterile spaces like buffer rooms and ante rooms, while keeping hazardous particles within compounding areas

- **Humidity & Ambient Condition Monitoring** prevents contamination, static buildup, and mold growth from harming equipment or staff, or compromising sample quality

The Power Behind Every Sonicu System

Flexible, Secure Connectivity

- Wi-Fi, Cellular, or Ethernet connectivity options
- Secure data transmission across critical care, dietary, and other regulated environments
- Cellular Failover to maintain monitoring during outages (optional)
- Integration capabilities with existing systems, such as power generators, smart thermostats, or BMS/BAS

Dashboards & Visualization

- Enterprise Dashboard allows you to see your entire organization at a glance
- Single-Site Dashboards for focused, local oversight
- Interactive Floor Plan Views to quickly locate alarms and devices
- Role- and Privilege-Based Access to align visibility with user responsibilities

SMART Alarm Handler

- Tiered Escalation Alarms that keep teams focused and operations protected
- Eliminate alarm fatigue with configurable thresholds and notification delays
- Tailored alarm settings for specific rooms, equipment, or zones, and either call, text, email, or push notification
- Access through the SoniCloud app for alarm management anywhere

Audit-Ready Compliance

- Detailed excursion reports sent straight to your inbox automatically
- Documentation of corrective actions with traceable audit history
- DataSync technology prevents data gaps during power or network outages
- Sonicu's SNAP Calibration Program is an easy, cost-effective way to maintain compliance without the hassle of conventional recalibration (optional)

Who We Are

Sonicu is the most scalable and secure monitoring and compliance platform available. Our turnkey solutions are purpose-built for specialty pharmacy, compounding rooms, and monitoring assets in transit.

With no IT support required, Sonicu is easy to implement, delivers real-time remote visibility, and ensures compliance all while providing accurate temperature monitoring and critical alerts for power outages or system failures.

24/7 Remote Monitoring: Real-time visibility and alerts for temperature excursions, power outages, and system issues from anywhere on your phone, tablet, or laptop

Asset Protection: With smart alarming, tiered escalation, and centralized monitoring, your team can respond faster, protect critical environments, and avoid downtime

USP & ISO Compliance: Simplify your path to compliance and accreditation with automated environmental monitoring, real-time alerts, and audit-ready reporting delivered to your inbox

Hassle-Free Setup: With our simple, guided implementation via the Implementation Wizard, deployment takes less than 10 minutes

Don't let tight budgets prevent you from getting the monitoring and compliance solution your pharmacy operation needs, and your patients deserve.

Sonicu offers flexible financing options that will help you manage budgets, and makes your monitoring solution affordable.
