Healthcare Monitoring

Streamlining Operations Across Your Entire Enterprise

Automated Monitoring Built for Healthcare

The Sonicu monitoring system delivers a complete, end-to-end solution for protecting cold storage, cleanrooms, and other critical hospital environments.

We've combined best-in-class hardware, expert services, and SoniCloud, our cloud-hosted software, to offer complete monitoring and compliance solutions all on one seamless platform.

With Sonicu, you get enterprise-grade monitoring technology, hosted on Amazon Web Services (AWS) for maximum reliability, security, and scalability. And implementation is a breeze.

- Reduce admin workload and simplify compliance with automated, real-time logging and reporting that meets Joint Commission, Board of Pharmacy, and other regulatory standards

- Eliminate data gaps with DataSync, which stores and forwards data during connectivity loss to ensure complete records

- Deploy and scale easily across your enterprise with wireless, cellular-enabled sensors that install easily without IT support

View conditions from anywhere on your PC, tablet, or smartphone

Trusted by Thousands of Health Facilities Nationwide

Hospitals | Clinics | Surgery Centers | Senior Living | Health Depts

Sonicu started in hospitals. Today, hospitals and healthcare facilities across the U.S. turn to Sonicu for simplified monitoring and compliance.

Any organizations associated with major healthcare GPOs, Vizient or Premiere, are eligible for pre-negotiated discounted rates to upgrade to a Sonicu system.

OhioHealth | **Indiana University Health** | **Hendricks** Regional Health | **option care health®** | **Piedmont** HEALTHCARE

"Thanks to our monitoring and alerts with Sonicu, we saw that humidity levels in that new [oncology] building kept rising into areas that were unacceptable for the sensitive work underway.

"The advances in technologies for patient care in the past decades are nothing short of miraculous and technologies like Sonicu are very much part of our technology investment."

Hancock Regional Hospital

"We knew we needed technology like Sonicu to help compensate for the gaps in our system. Our people were doing a solid job of manually logging temperatures but they also get called in a lot of directions and sometimes a log gets missed and that's simply not acceptable because you always knew in the back of your mind that's a risk for the patients."

Hendricks Regional Health
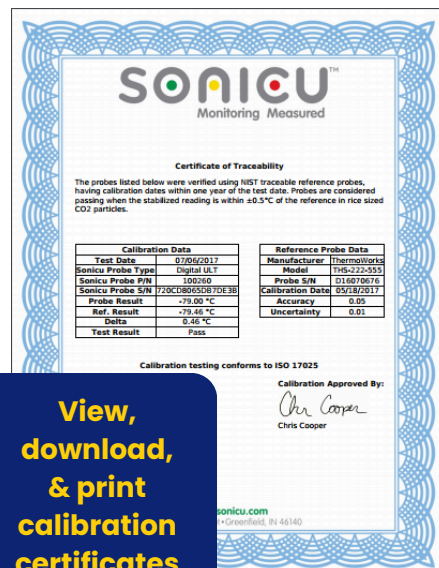

Discover Our Full Line of Monitoring Hardware

Reliable monitoring starts with the right hardware.

From completely wireless temperature probes to advanced air pressure sensors and smart hubs, Sonicu offers a breadth of products including meters, sensors, and hubs—all engineered for accuracy, reliability, and seamless integration.

SoniShield Duo with Glycol Sensor and Display (optional) for Fridge/Freezer Monitoring

SoniShield View with Temperature, Humidity, & Pressure Monitoring for Cleanrooms & Compounding Rooms

SoniLink Hub with S-Series Temp & Humidity Sensor for Dietary & Warehouse Monitoring

When you combine our NIST Certified Sensors (calibrated in our ISO-accredited lab), flexible connectivity, and SoniCloud software, you get a proven platform trusted by thousands of healthcare facilities.

- **Temperature Monitoring** for medication storage, warmers, ultra-low freezers, blood banks, walk-in units, and more

- **Air Pressure Monitoring** safeguards sterile spaces like surgical suites, isolation rooms, and compounding pharmacies

- **Humidity & Ambient Condition Monitoring** prevents contamination in cleanrooms, operating rooms, and inpatient pharmacies

The Power Behind Every Sonicu System

Flexible, Secure Connectivity

- Wi-Fi, Cellular, or Ethernet connectivity options
- LoRaWAN Sensor Connectivity for extended range reduces IT burden
- Secure data transmission across critical care, dietary, and other regulated environments
- Cellular Failover to maintain monitoring during outages (optional)

Dashboards & Visualization

- Enterprise Dashboard allows you to see your entire organization at a glance
- Single-Site Dashboards for focused, local oversight
- Interactive Floor Plan Views to quickly locate alarms and devices
- Role- and Privilege-Based Access to align visibility with user responsibilities

SMART Alarm Handler

- Tiered Escalation Alarms that keep teams focused and operations protected
- Eliminate alarm fatigue with configurable thresholds and notification delays
- Tailored alarm settings for specific rooms, equipment, or zones, and either call, text, email, or push notification
- Access through the SoniCloud app for alarm management anywhere

Audit-Ready Compliance

- Detailed excursion reports sent straight to your inbox automatically
- Documentation of corrective actions with traceable audit history
- DataSync technology prevents data gaps during power or network outages
- Sonicu's SNAP Calibration Program is an easy, cost-effective way to maintain compliance without the hassle of conventional recalibration (optional)

Who We Are

Sonicu is the most scalable and secure monitoring and compliance platform available. Our turnkey solutions are purpose-built for hospitals and other busy healthcare facilities.

With no IT support required, Sonicu is easy to implement, delivers real-time remote visibility, and ensures compliance all while providing accurate temperature monitoring and critical alerts for power outages or system failures.

24/7 Remote Monitoring: Real-time visibility and alerts for temperature excursions, power outages, and system issues from anywhere on your phone, tablet, or laptop

Asset Protection: With smart alarming, tiered escalation, and centralized monitoring, your team can respond faster, protect critical environments, and avoid downtime

Built for Healthcare Compliance: Simplify your path to compliance and accreditation with automated environmental monitoring, real-time alerts, and audit-ready reporting delivered to your inbox

Hassle-Free Setup: With our simple, guided implementation via the Implementation Wizard, deployment takes less than 10 minutes

Tight Budget and Limited Capital? No Problem!
Sonicu offers flexible financing options that will help you manage budgets.

We're also contracted with major healthcare GPOs including Premier and Vizient. If you're affiliated with one of them, you're already approved for a Sonicu system.

Contact our team to learn how to make solution acquisition painless and easy.
