

OUR GOAL: Your Peace of Mind

A photograph of two healthcare professionals in a clinical setting. On the left, a man in blue scrubs and a white surgical mask is looking down at a tablet. On the right, a woman in light green scrubs, a white surgical mask, and a blue hairnet is looking towards the man. The background is a blurred hospital hallway.

Enterprise Healthcare

COMPLIANCE. SAFETY.

And Reduced
Manual Processes.
Our commitment
to your team.

Hospitals are filled with crucial areas that must be maintained at proper temperature and environmental conditions.

From the operating room to the cafeteria freezer, consequences of a broken freezer or compromised clean room can range from the loss of tens of thousands of dollars in inventory **(the average pharmacy/hospital fridge contains \$25,000 in perishable assets)** to serious injury or death of a patient.

Your team requires coordination across the entire organization, complex protocols and much more in an ever-changing environment.

Can you afford to risk the efficacy and safety of your vaccines and medications due to human error or oversight in monitoring?

Integrating technology into today's healthcare system can help you automate your most tedious and burdensome compliance requirements.

Continuous temperature and environmental monitoring technology is essential to any healthcare facility - from a remote rural clinic to the most complex urban hospital - to protect the safety of patients and reduce the stress of regulatory compliance.

Instances of temperature excursions and deviations in healthcare facilities have led to millions of dollars in financial losses and regulatory penalties.

What if your fridge shuts down in the middle of the night with thousands of vaccines inside and you do not have a 24/7 control monitoring system?

Without the proper monitoring, critical changes in environmental conditions may go unnoticed, leading to inefficiencies, and delays in patient care delivery.

All stand in the way of exemplary patient care

MONITORING MADE EASY.

Considering an Enterprise Monitoring Package?

What is your staff manually logging that a sensor could automate and save staff time to focus on more mission critical or revenue-generating activities.

ASSESSMENT

Thinking about an Enterprise Monitoring Package? Let's take the first step with this self-evaluation of all points of monitoring that Sonicu could automate for your enterprise. Afterwards, reach out to one of our friendly representatives at info@sonicu.com for more information!

Temperature Monitoring

- Medication Fridges
- Medication Freezers
- Blanket Warmers
- Fluid Warmers
- Walk-in Coolers
- 80 Freezers
- Cryogenic Storage
- Kitchen Warmers
- Lab Warmers
- Heating Blocks
- Incubators
- Hydrocollators
- Pipe Temperatures

Temperature Monitoring

- Ambient Temperature
- Humidity
- Air Velocity/ Air Changes
- Oxygen Levels
- Air Quality

Sound Monitoring

- NICU
- Patient Areas

Pressure Differential Monitoring

- Clean Rooms
- Surgery Suites
- Isolation Rooms
- Sterile Storage Rooms
- Soiled Utility Rooms
- Fire Stairwells

Status Change Applications

- Water Rope/ Leak Detection
- Door Open/ Door Close
- Room Occupancy
- Tank Level
- Dry Contact

Status Change Applications

- MRI Machine Status
- Chiller Machine Status
- Vibration
- Light
- Power: AMPs, Volts

INDIANA UNIVERSITY HEALTH: A Major Midwestern Hospital

“IU Health’s program was implemented many years ago using a single, privately owned server located at the Methodist campus data center. While having a privately-owned server has its benefits, it also requires liability of all points being maintained in one place.

Consolidating with one provider helps us better manage our assets and our people, and gives us system wide visibility. Sonicu provides excellent customer service and is very user friendly.”

MONITOR VIRTUALLY ANYTHING:

We help clients connect their organization to the cloud for improved operational visibility

From occupancy to water leaks, we can help you with simple and affordable solutions to better monitor your mission-critical facilities.

AFFORDABLE AND SIMPLE Enterprise Monitoring:

Trusted, Proven and Reliable

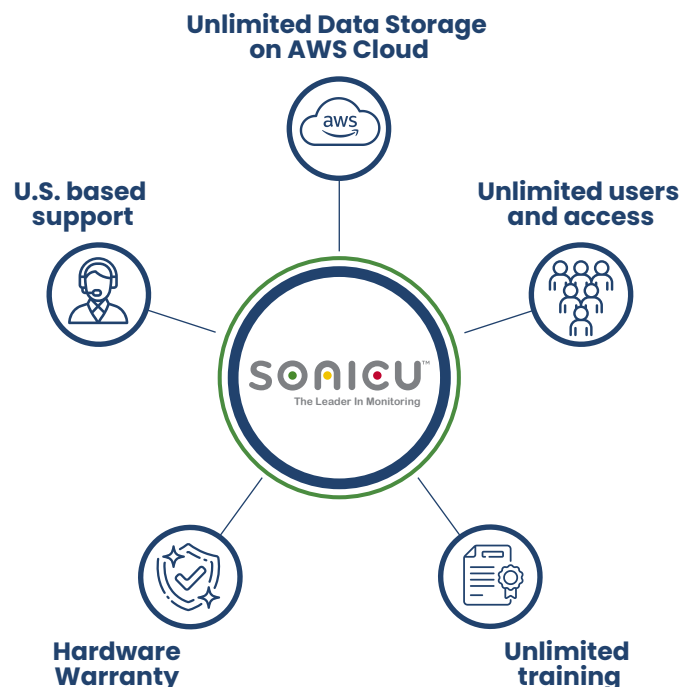

Sonicu's Enterprise Monitoring system is the most comprehensive and streamlined solution for hospitals.

Once all the monitoring points for temperature, humidity, air pressure differential, and sound are consolidated into our Sonicloud platform, your organization will have unparalleled operational visibility and peace of mind.

Our system is designed to be easy to install and simple to use, save money, and automate regulatory compliance.

With Sonicu you can customize your needs, such as unique floor plan layouts or specific cybersecurity requirements.

With our advanced temperature monitor system, you can have peace of mind knowing that any temperature fluctuations or equipment malfunctions will be detected immediately.

“Speed is so important to us, and Sonicu has made everything fast and easy. It’s two minutes to install a probe, and then easy to connect to cellular and add my users in a few more minutes. I can get my teams up and running fast. ”

SoniLink Hub in a Hospital

- 100% Wireless temperature (humidity available) sensor – Installs in seconds with no tools needed
- IP-67 Rated, ideal for cold storage environments
- Highly Cost-Effective – Easily scales across your facility(s)
- App-based implementation Wizard – Easy to setup
- Available w/NIST Certification – Maintain Compliance

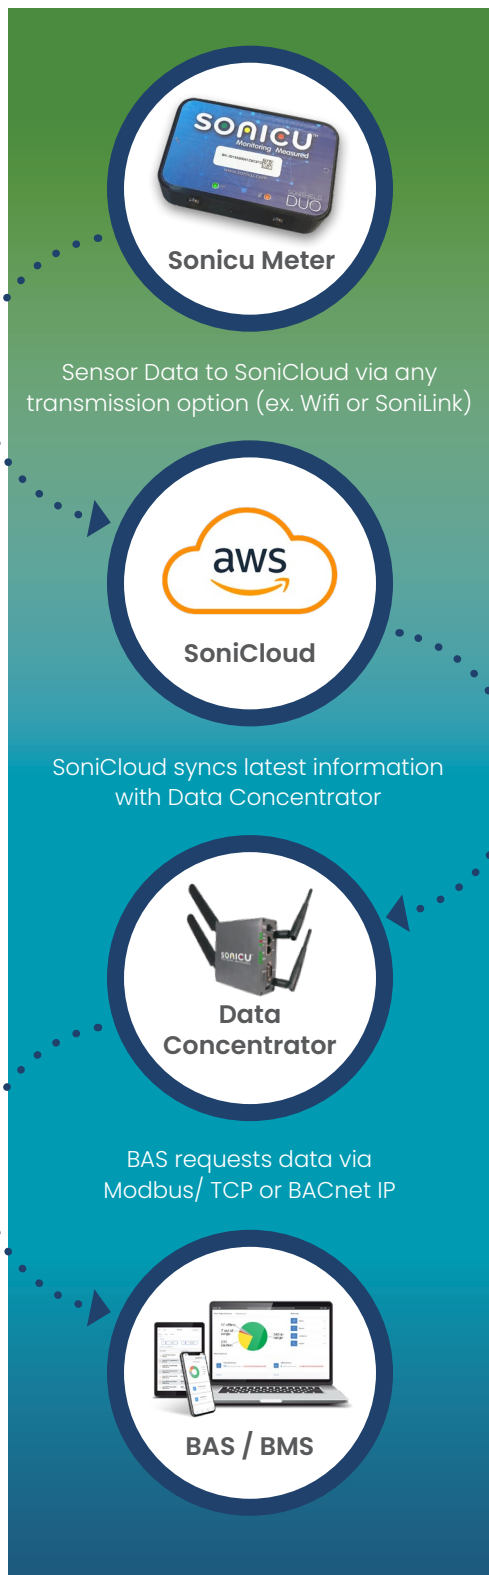

SEE YOUR CONDITIONS ACROSS YOUR FACILITY: Smarter management tied to your BMS

Your bird's eye view on threats to your operations and revenue:
Available anywhere, anytime.

SONICU CloudLink

How does it work?

The Data Concentrator solution requires two steps:

1. In coordination with Sonicu, a customer establishes a profile including which points of monitoring should be reflected on the Data Concentrator.
 - a. This includes setting up 'slot mapping', indicating which point of monitoring in SoniCloud should be replicated to which 'slot' in the Modbus/BACnet memory map.
 - b. The customer programs their BAS/BMS to connect to the Data Concentrator via either Modbus/TCP or BACnet IP.
2. They can query the Data Concentrator for temperature and environmental monitoring data, translate the data into the format desired for their system, and load the data into their BAS/BMS.

All of Your Healthcare Environmental Monitoring CONSOLIDATED ON ONE PLATFORM

Sonicu provides a full suite of monitoring solutions, fully automated 24/7 remote monitoring, alarming, and reporting for cold-chain, room conditions, and virtually any custom monitoring application.

Our cloud based software, Sonicloud, gathers data to a single dashboard, giving you web-based access to critical information from anywhere.

Facilities

Alerts and alarms to you, your staff, and your facility manager via text, email, push notifications and calls.

Alert hierarchies can be customized based on your needs, whether it be a change in personnel or scheduling. Sonicu provides a wireless monitoring ecosystem to keep your organization running.

Keep your team equipped with the monitoring tools they need to be successful.

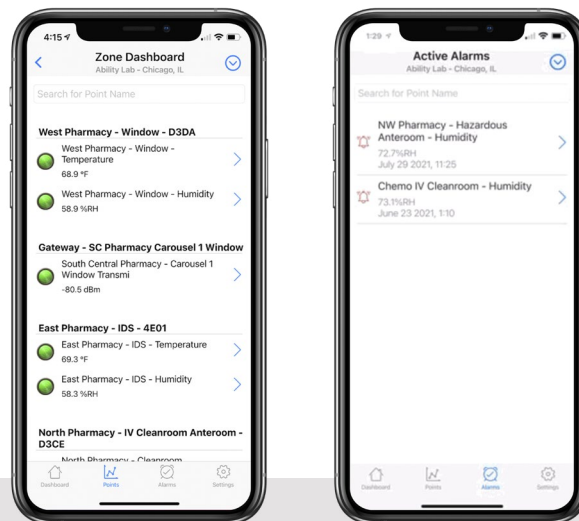

Pharmacy

Need to keep medications at a certain temperature? Not doing so could drastically reduce their effectiveness, cause severe loss, and lead to regulatory issues.

Sonicu covers all pharmacy needs - from ambient temperature monitoring to humidity and differential pressure.

Laboratory

Some of the most crucial assets to a hospital's enterprise are stored in their labs. Implementing our remote monitoring system can help your staff ensure everything is running properly. Sonicu supplies monitoring for cryogenic storage, -80F freezers, incubators, and more!

Tim Livesay

Pharmacy Director
Hancock Regional Hospital

[WATCH VIDEO](#)

“Thanks to our monitoring and alerts with Sonicu, we saw that humidity levels in that new [oncology] building kept rising into areas that were unacceptable for the sensitive work underway... “The advances in technologies for patient care in the past decades are nothing short of miraculous and technologies like Sonicu are very much part of our technology investment.”

Healthcare facilities need a system in place to monitor temperature, pressure, humidity, and more. If you are still using manual processes to complete these tasks, you could be saving time, money, and other precious resources. Sonicu automates these tasks for you, storing your data securely, giving you easy access from anywhere.

Surgical Rooms

These rooms are among the most regulated environments in the world. Failure to maintain surgical rooms in pristine condition can result in lost revenue, time, and jeopardize patient safety. Sonicu monitors pressure differentials, humidity, and temperature as well as equipment such as sterilizers and fluid warmers.

Vaccine Clinics

Vaccine compliance is a critical role for pharmacists, because failure to handle and store them properly can be detrimental to the effectiveness of drugs and can cost thousands if they become unusable. Sonicu helps you monitor these vaccines and alleviate the burden of reporting. You'll save more vaccines along the way with our alarm and notification system.

Patient Areas & Nursing

Nurses wear many different hats, from caretaking for patients to logging temperature data from fridges in their unit. This can burden staff that are already balancing many responsibilities. Sonicu is the bridge between patients, nurses, and technology. Our sound monitors helps you keep patient areas quiet, patient experience positive, and gives providers more time to care for patients.

Dining & Nutrition

Anything a patient consumes while under your care is required to be monitored to ensure quality and safety. Our automatic temperature monitoring system and reporting can help you reduce the risks of infections and diseases among patients.

“We knew we needed technology like Sonicu to help compensate for the gaps in our system. Our people were doing a solid job of manually logging temperatures but they also get called in a lot of directions and sometimes a log gets missed and that’s simply not acceptable because you always knew in the back of your mind that’s a risk for the patients”

Martha Rardin

Director, Nutrition,
Hendricks Regional Hospital

YOUR CONNECTIVITY: Flexible, reliable and secure

Hundreds of facilities rely on us to mitigate expensive operational errors and enhance preparedness for compliance requirements. This ensures the comfort and safety of patients, employees, suppliers, and visitors and enables pharmaceutical storage facilities to function correctly.

Our system automates data collection, monitors critical parameters, and generates detailed reports, making compliance management efficient and stress-free.

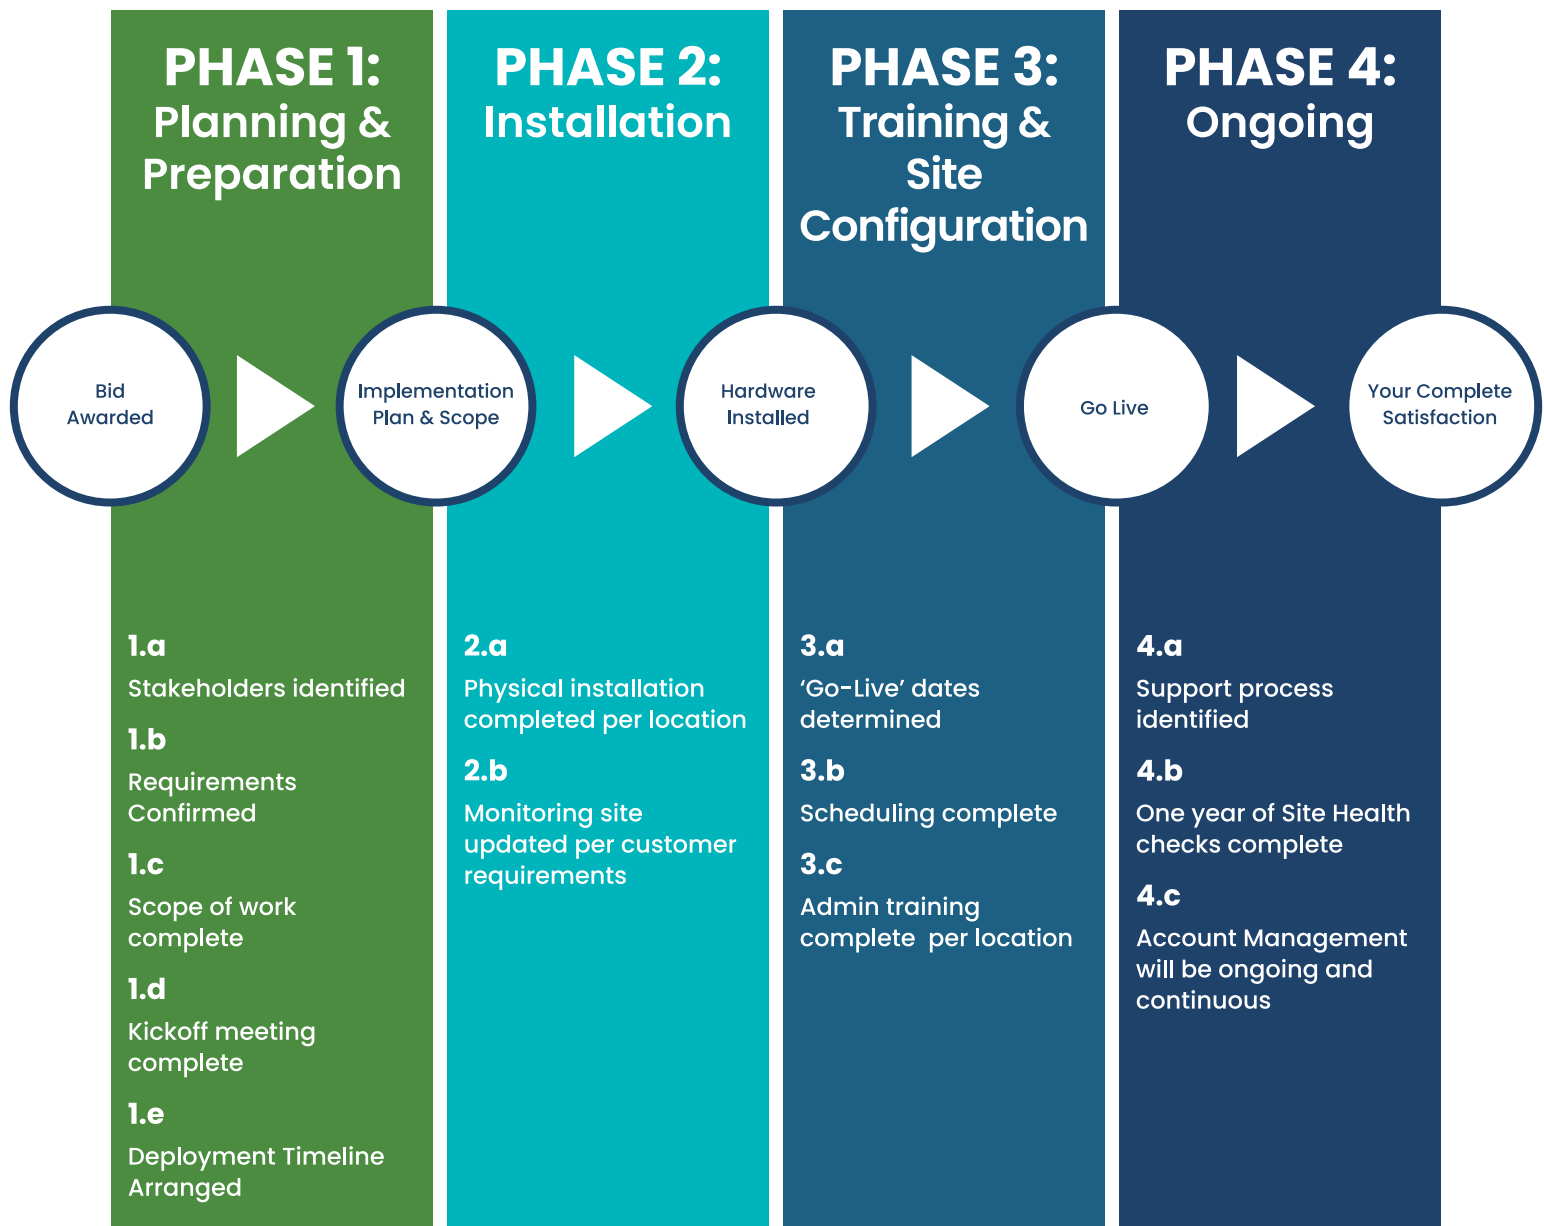

At Sonicu, we empower businesses to reimagine their approach to compliance, quality assurance, and operational efficiency. We streamline and optimize how organizations collect data, monitor, and comply with regulatory requirements.

Wi-Fi – Cellular – SoniLink Options to make data transmission easy

We invite you to experience the transformative power of Sonicu firsthand.
Let us help you unlock the full potential of your organization, enhance compliance, and drive operational excellence.

IMPLEMENTATION

Satisfy your compliance in a SNAP

View, download, or print calibration certificates online in PDF format instantly from any web browser

Our SNAP Calibration program assures that your temperature and environmental monitoring sensors are accurate, properly calibrated, and meet regulatory compliance without the need for conventional recalibration.

This program is designed to provide our clients with minimal risk, loss, disruption and non-compliance when one or more of our sensors are not working properly.

This process is easy, Sonicu provides new sensors with NIST traceable calibration certificates prior to your current expiration date. Sonicu will remove the old sensor and snap the new sensor into place!

What does Sonicu's SNAP Calibration program provides?

- Easy & cost effective way to maintain regulatory compliance without the hassle of conventional recalibration.
- Everything from alarming and protecting to logging and reporting depends on proper data from precise, properly calibrated sensors.
- Ensures your temperature sensors are accurate, properly calibrated, and meet regulatory compliance.
- Sonicu adheres to strict quality controls and maintains ISO 17025 compliance.

How are you benefiting from our SNAP Calibration program?

- Remove administrative burden, uncertainty, and worry about required, recurring sensor calibration.
- Eliminate downtime associated with conventional recalibration.
- SNAP Calibration is far less expensive than traditional recalibration services.

WHO WE ARE

Sonicu is a leading provider of innovative solutions that transform how organizations monitor and manage critical environments. We specialize in leveraging the power of IoT (Internet of Things) technology to provide real-time monitoring, data analytics, and actionable insights.

Our comprehensive range of solutions covers a wide range of industries, including healthcare, food service, pharmaceuticals, retail, hospitality, and more.

Sonicu's offerings include automated monitoring systems for temperature, humidity, pressure, air quality, and other vital parameters.

With Sonicu, organizations can proactively monitor their environments, ensuring compliance with regulatory requirements, optimizing operational efficiency, and safeguarding the quality and safety of their products and services.

Our advanced technology and intuitive platform enable businesses to make data-driven decisions, mitigate risks, and drive continuous improvement.

Trust Sonicu
to transform your monitoring practices and
empower your organization with actionable
insights for success.
