

# SNAP•Calibration

Sonicu's SNAP Calibration Program provides an easy & cost effective way to maintain regulatory compliance without the hassle of conventional recalibration

## SONICU SOLUTION

A temperature monitoring program is only as good as its sensors' accuracy. Everything from alarming and protecting to logging and reporting depends on proper data from precise, properly calibrated sensors and probes.

Any enterprise that monitors critical asset or process temperatures should have a recalibration strategy in place to minimize risk, loss, disruption and non-compliance.

Sonicu SNAP Calibration program ensures your temperature probes are accurate, properly calibrated, and meets regulatory compliance.

With SNAP Calibration enrollment, Sonicu sends new probes with NIST traceable calibration certificates prior to your current expiration date. Calibration compliance is completed by removing the old probe, snapping the new probe into place.

## OUR ADVANTAGES

- Removes administrative burden, uncertainty, and worry about required, recurring probe calibration.
- Completely eliminates downtime associated with conventional recalibration.
- SNAP Calibration is far less expensive than traditional recalibration services.
- Plug-and-play implementation makes Sonicu SNAP Calibration the most efficient recalibration system on the market.
- View, download, or print calibration certificates online, in PDF format instantly from any web browser.
- Sonicu adheres to strict quality controls and maintains ISO 17025 compliance.
- SNAP Calibration is available for Sonicu's full line of digital temperature probes and sensors.

## HOW IT WORKS, Easy as 1..2..3..

- Enroll in Sonicu's SNAP Calibration Program. Email [info@sonicu.com](mailto:info@sonicu.com) to enroll.
- Receive notification from Sonicu, prior to current certificate expiration that replacement probes are on the way.
- Once your new calibrated probes arrive, simply un-SNAP the old probes, and SNAP in the new. Recalibration is now complete!

# Sonicu Common Probe Applications

Medication/ Vaccine Fridges		Water Temperature	
Medication/ Vaccine Freezers		Incubators	
Patient Nutrition Fridges/ Freezers		Walk-in Coolers/ Freezers	
Breast Milk Fridges		Food Prep Refrigerated	
Blanket Warmers		Food Prep Warmers	
Fluid Warmers		Reach-in Coolers/ Freezers	
Ultra Low -80 Freezers		Warehouse Room Temp/ Humidity	
Cryogenic Storage		Air Pressure	

\*Sonicu Universal Meter can support any commercially available sensor for applications not listed here.

**Any** Department. **Any** Application. **One** Choice.

**Sonicu SNAP Calibration:**  
Confidence. Convenience.  
Cost-effectiveness.

## Probe Key

## Description

	<b>Glycol-Buffered Temp</b> -40° C to 25° C
	<b>Solid-Buffered Temp</b> -40° C to 25° C
	<b>Non-Buffered Temp</b> -55° C to 125° C
	<b>Ambient Temp</b> -40° C to 60° C
	<b>Relative Humidity</b> 0 to 100%
	<b>Ultra Low Temp</b> -100° C to 0° C
	<b>Cryogenic Temp</b> -205° C to 0° C
