

The Leader In Monitoring

THE ESSENTIAL TEMPERATURE & ENVIRONMENTAL MONITORING SYSTEM

Kits are complete solutions that deploy quickly to monitor and log temperature, humidity and air pressure differential 24/7

Features include:

Mobile app or web access for any browser

NIST certified sensors

Configurable alarming with escalation and snooze from mobile app

Power & network connectivity redundancy for maximum protection and compliance reliability

Optional Door Open alert and Loss of Power alerts

Industry-leading connectivity, security and scalability makes it simple and affordable for compliance, risk management, quality, facilities and clinical staff to connect from anywhere and access reporting data at any time. An enterprise solution trusted by hundreds of healthcare facilities to improve safety and compliance in virtually any sensitive environment.

Kit Choices

Select by connectivity option

Plug-and-play sensors that can scale across any organization

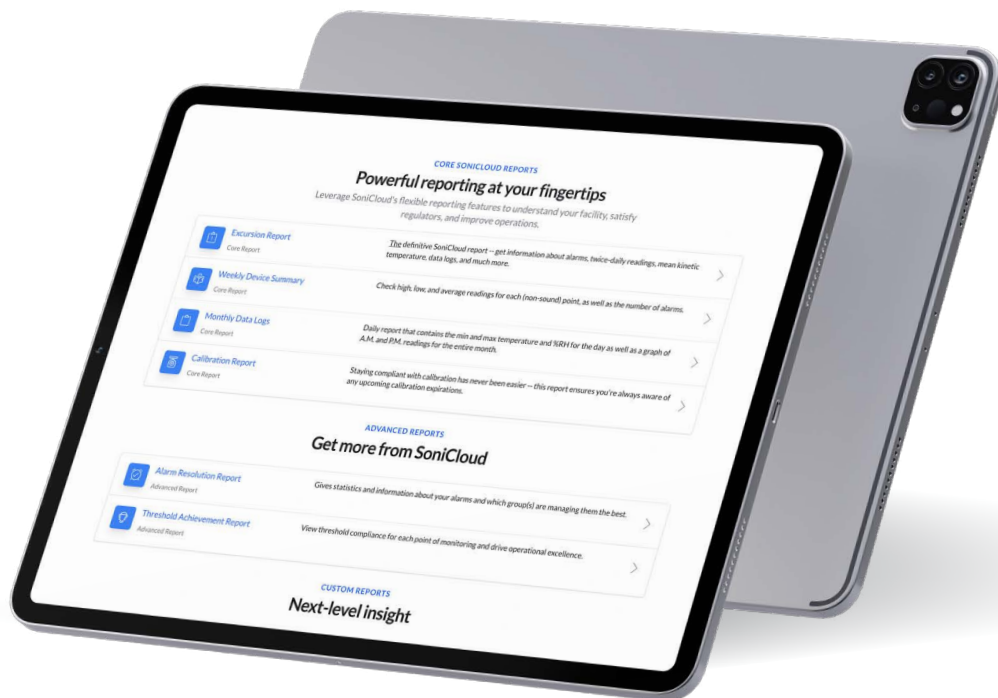

SKU

Connectivity options: Wi-Fi, Cellular and SoniLink (LoRaWAN)

| Includes | Application | |
|-------------------------|--|-------------------|
| SoniShield View | -- | ML-VIEW-SL |
| SoniShield Duo | -- | ML-DUO-SL |
| SoniLink Hub | -- | HUB-Eth |
| Glycol Buffered Probe | Vaccine Monitoring, Walk-ins, Pharmacy & Tissue | ML-DUO-SL-GB-DISP |
| Air Differential sensor | Cleanrooms, Compounding Pharmacies & Critical Environments | ML-DUO-SL-DP |
| ULT/Cryo | -80°C Freezer & Cryo Storage | ML-DUO-SL-UL |
| Incubator | CO ₂ & Humidity | ML-DUO-SL-IN |
| Temp/Humidity sensor | Ambient Conditions | ML-DUO-SL-HT |
| SoniShield Display | -- | ML-DISP |
| S-Series sensor | -- | S-T/S-HT (NIST) |
