

Pharmaceutical Monitoring

Protection, Standardization,
and Peace of Mind

Save Time, Save Money, and Stay Audit-Ready 24/7

Each pharmacy specialty — compounding, manufacturing, distribution, and retail — comes with its own regulatory requirements. No matter your area of expertise, Sonicu's automated monitoring solutions are built to streamline your workflows and protect your assets.

System-Wide Visibility & Monitoring

From fridges and freezers to compounding differential pressure readings, Sonicu monitors it all under **one centralized platform** through a **wide breadth of product**. Our software, SoniCloud, aggregates temperature, humidity, pressure differentials, and even Building Management Systems into a single web-based dashboard.

Compliance Standardization at Your Fingertips

Regulations constantly change and inspectors can show up at any time. Our automated solutions simplify the complexities of regulatory compliance across the board. Just a few clicks and you're **audit-ready at all times**.

Unmatched Alarm Handling

Balancing compliance with operational efficiency requires more sophisticated alarm management. Sonicu's **SMART Alarm Handler** offers buffering features, tiered escalation, and configurable alerts to ensure critical alerts reach the right people until the issue is resolved.

Calibration Made Simple

Sonicu sensors automatically upload electronic calibration certificates into SoniCloud, so you always have them on hand. Our **SNAP Calibration Program** takes away the burden of recalibration, and ships newly calibrated probes to your door.

Maximum Data Protection

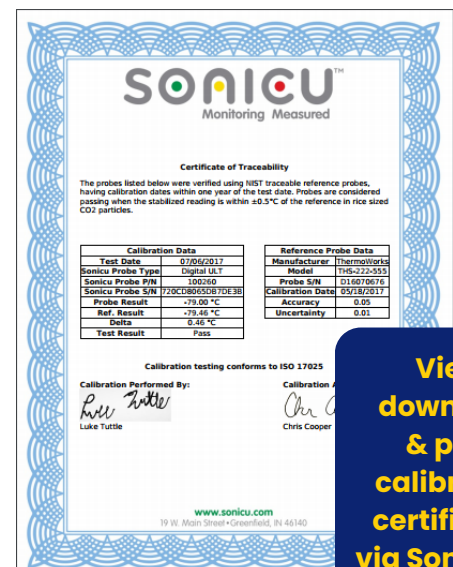

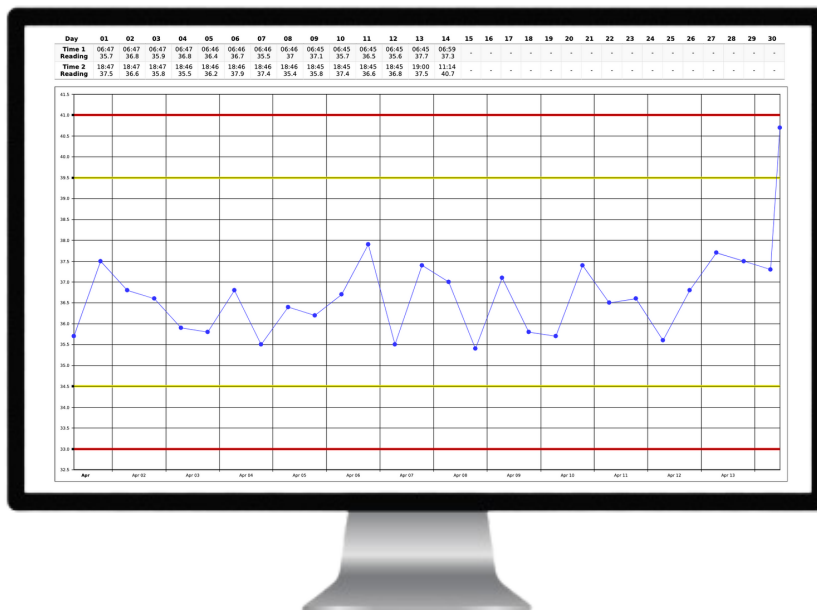

Sonicu's system provides multiple layers of redundancy to deliver 3X as much data protection and maintain a complete audit trail. **Battery backup** keeps Sonicu monitoring during power outages. **Cellular failover** prevents loss of connectivity if your primary network goes down. If connectivity is lost, our **DataSync** feature stores and forwards missing readings once you're back online.

Stress-Free Regulatory Compliance

A surprise visit from an auditor can cost thousands in violation fees. The key is to stay prepared. This is made possible when you choose a monitoring system that also automates documentation for you. Here's how SoniCloud meets these needs.

- **Automated Reporting:** Sonicu's platform automatically sends detailed excursion reports to your email. If you get a random audit, you can request a report on-demand in just a few clicks.
- **Complete Traceability:** Every alert and corrective action is logged automatically on compliance reports, providing a full audit trail that satisfies compliance requirements across multi-department coordination.
- **Digital Calibration Certificates:** Each Sonicu sensor automatically uploads its calibration certificate onto the dashboard, which can be viewed, downloaded, and printed for your records.
- **Probe Recalibration Program:** Save big on calibration costs by enrolling in Sonicu's Probe Replacement Program. We'll send you replacement sensors when you need them, keeping you in compliance 24/7/365.

Monitoring and Compliance Made Simple

Sonicu's exclusive monitoring capabilities are unmatched. You get smarter alarm solutions, audit-ready reports, and seamless integration with third-party systems so you can see it all under one dashboard.

No matter if you manage one location or an entire enterprise, Sonicu delivers real-time visibility and total dashboard control without overly burdening your IT team.

SoniCloud Platform

Our platform pulls all your monitoring data into one place. Our plug and play installation makes it easy to scale your SoniCloud site as your organization grows.

SoniCloud Mobile App

Track real-time conditions, manage alarms, and gain actionable insights straight from your smartphone, tablet, or PC.

Meters, Sensors, and Hubs

The hardware behind our platform. Sonicu's meters, sensors, and hubs work together to provide precise, real-time environmental data without relying on your facility's IT infrastructure.

API Integration

Sonicu seamlessly integrates with your existing tech stack. Whether you're merging us within your building management systems (BMS) or other workflow tools, our APIs and SSO make it easy to connect and scale.

Why Choose Sonicu

Flexible Connectivity

Other providers expect you to connect their way. Sonicu supports Wi-Fi, Cellular, or Ethernet connectivity, so you can choose what fits your environment best, with built-in redundancy to keep you connected even during outages.

Intuitive & Ease of Implementation

Customize your SoniCloud site layout how it makes sense for your operations. Configure alarm thresholds, buffer times to prevent alarm fatigue, and tiered escalation to alert the right people at the right time.

Audit-Ready Reporting

Our reporting suite comes with pre-built reports, identifies trends and risk areas, and boosts accountability, so you can stay ahead of costly equipment failure without impacting daily operations.

"There's always that extra peace of mind when you're able to see in real-time the power supply situation from your cell phone during a natural disaster."

Peace of Mind is Just a Call Away

Speak with our experts to learn more about how Sonicu improves daily operations while protecting your most critical assets.

Sonicu streamlines compliance documentation, report generation, alarm management, and all environmental monitoring under the same platform.

Our system combines wireless sensors, automated data logging, and built-in redundancy to deliver uninterrupted oversight of your facilities 24/7.

With over a decade of industry experience, we have the knowledge and hardware necessary to best protect inventory, CSPs, and your sterile and hazardous areas while keeping facilities compliant with USP, FDA, and state regulations.

- **Your Network, Your Way:** Choose Cellular, Wi-Fi, or the SoniLink Hub for secure, reliable connectivity. Cell failover also available for backup during outages.
- **Intuitive Dashboards:** Our customizable views align with your workflow, with real-time insights accessible from any web-based device.
- **Compliance Made Easy:** With both automated and on-demand report generation built into our software, you'll always be ready for your next inspection.
- **Intelligent Alert Routing:** Our SMART Alarm Handler holds teams accountable with multiple alert methods, tiered escalation, and repeating alarm features.
- **Scalable System:** Our platform adapts as your business needs change without missing a beat.

**2.5M Labor Hours Saved
with Automated Solutions**

**\$375M Worth of Assets
Saved with SMART Alarms**

**99.99% Uptime with Sonicu
Technology & Redundancy**

"Thanks to our monitoring and alerts with Sonicu, we saw that humidity levels in [a] new oncology building kept rising into areas that were unacceptable for the sensitive work underway. The **advances in technologies for patient care in the past decades are nothing short of miraculous** and technologies like Sonicu are very much part of our technology investment."
