SONICU™

Food Safety Monitoring for Student Nutrition Programs

Prevent Food Loss, Cut Costs, and Simplify Daily Tasks for Lean Kitchen Teams

An Easier Way to Run Your Kitchens

Food prices, growing expectations, and limited resources aren't in your control, but keeping your kitchen running safely and efficiently can be.

Sonicu streamlines temperature monitoring, compliance documentation, and food safety protocols on a cloud-based dashboard, so your teams can focus on delivering the high-quality meals students deserve.

Fully Automated Temperature Logs

No more missed temperature readings, and no more overlooked excursions. Sonicu's automated data logging technology keeps eyes on your cold storage units at all times.

District-Wide Visibility

Instant access to live and historical data across the entire school district, straight from any mobile device with web access.

Built-in Documentation

No more last-minute prep for surprise auditor visits. Sonicu sends audit-ready reports directly to your inbox on a set schedule or on demand in just a few clicks.

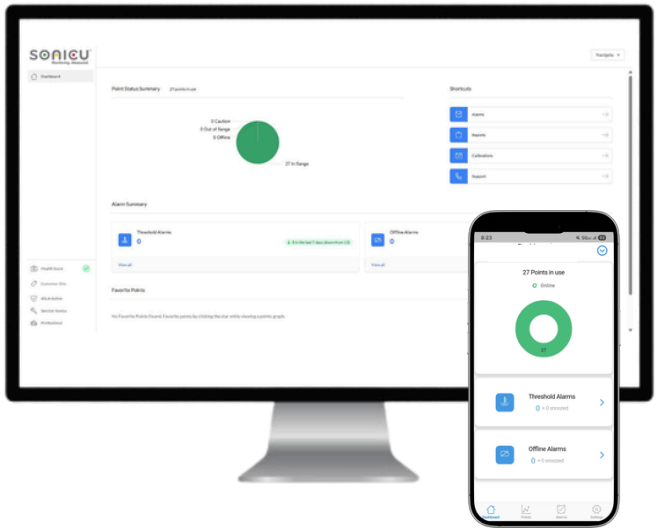

Intuitive Alarm Handler

When you combine real-time data monitoring across all locations with modern alarming tools, your teams will be notified of excursions or outages remotely, so the right people can address the issue quickly, saving inventory and the cost of replacing spoiled food.

SoniCloud Platform

Take complete control of your district's monitoring operations with an intuitive, enterprise-grade cloud software platform that's built for food safety compliance.

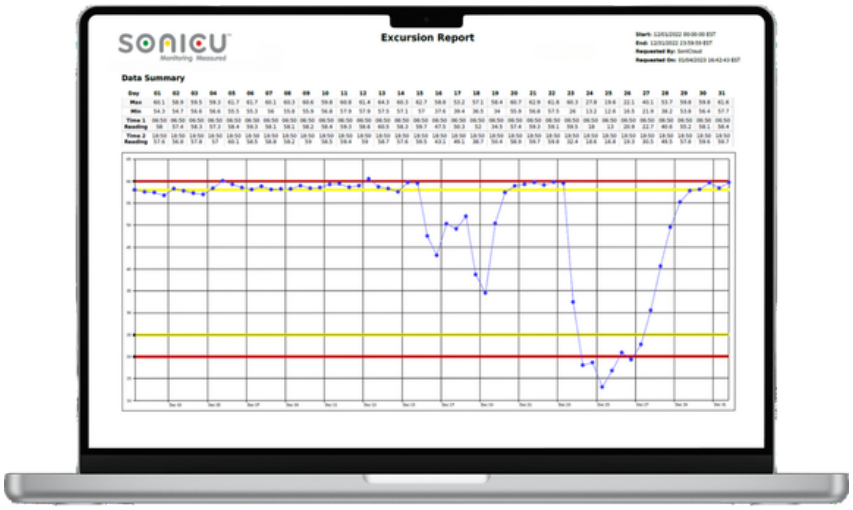

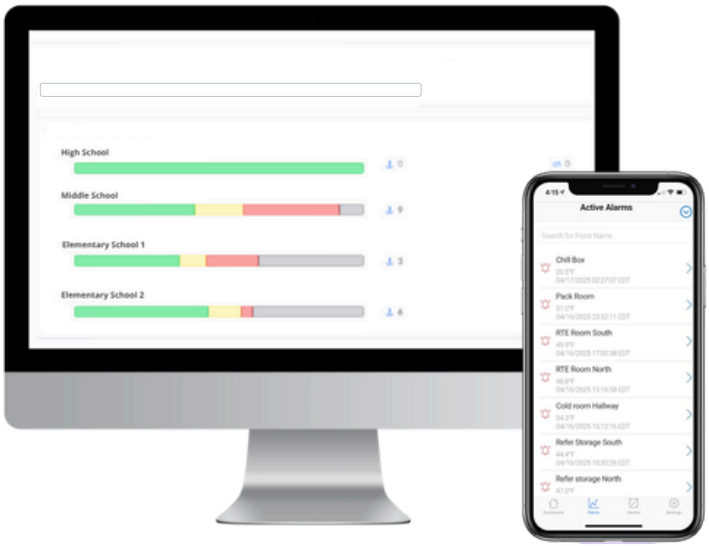

Your Dashboard, Your Way

- Fully configurable dashboard + alarm settings
- Generate reports on-demand or on a set schedule
- Role-based access and privilege
- Desktop and mobile access
- Unlimited data storage included
- Unlimited user creation
- No notification fees
- Electronic calibration certificates auto-uploaded

Inspection-Ready Reports

Sonicu's platform automatically sends detailed reports to your email. If you ever get a surprise visit from an inspector, you can generate a new data report in just a few clicks.

Role-Based Access

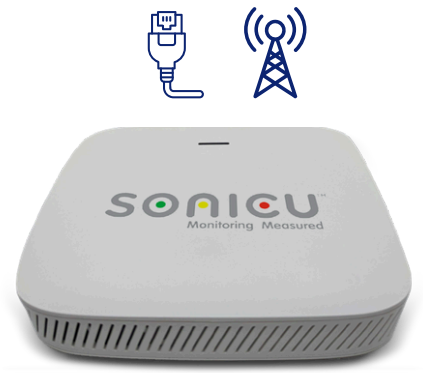

Each user only sees their assigned locations and equipment, keeping dashboards focused and relevant while district managers can see all location conditions on a single page.

Configure alarm thresholds and set up tiered escalation to alert the right people at the right time.

Wireless Temperature Monitoring

Deployment has never been easier. Simply power on your SoniLink Hub, up your meters, and that's it! No IT support necessary. Sonicu hardware connects in seconds by either scanning the NFC chip or with the press of a button.

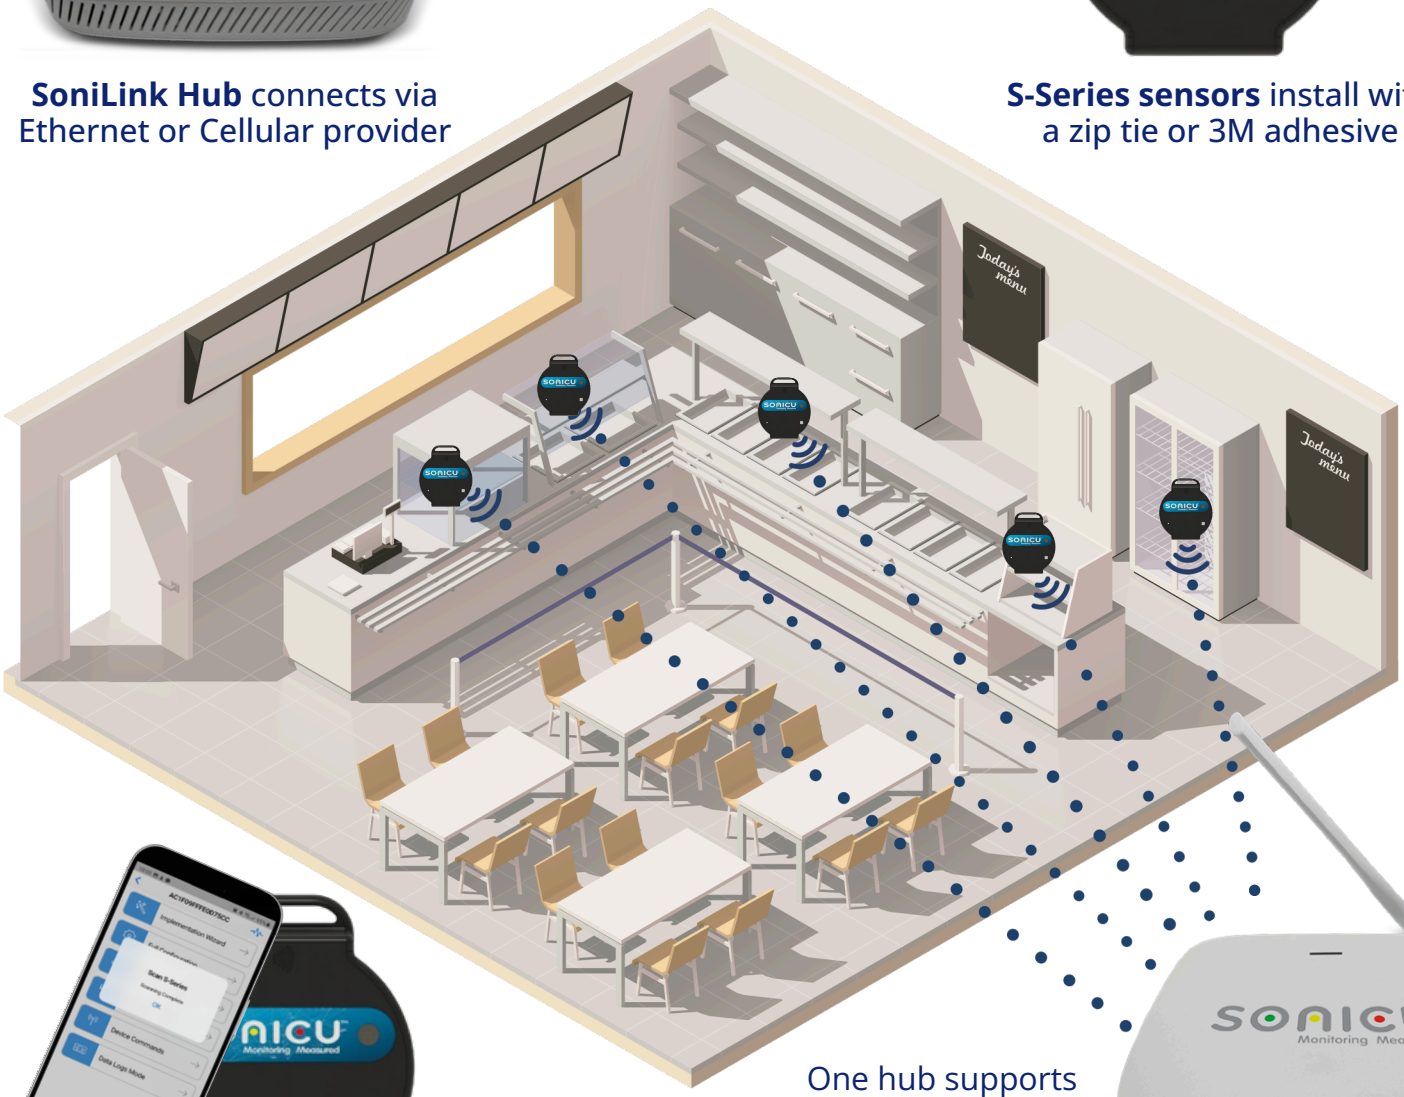

SoniLink Hub connects via Ethernet or Cellular provider

SKU: S-T

S-Series sensors install with a zip tie or 3M adhesive

Scan NFC Chip to Connect Sensor

One hub supports up to 500 sensors

SoniLink Hub Required

Cost-Effective Asset Protection

In the event of a power outage, Sonicu sensors continue monitoring in the background. Once the meter reconnects, it will backfill missing data automatically.

Peace of Mind in Your Pocket

Quick access to real-time readings, supported with red, yellow, green and gray visuals.

Preventative Maintenance

An out of range alert could be your first sign of an even bigger issue (such as a failing compressor) so you can take action before disaster strikes.

Built-In DataSync Feature

In the event of a power outage, Sonicu sensors continue monitoring in the background. Once the meter reconnects, it will backfill missing data automatically.

"We knew about temperature monitoring and had thought about it, but after we lost so much food, it was like “Oh yeah, we absolutely have to do this." We have to feed a lot of hungry Scouts and knew **we couldn’t afford another mishap that costs us thousands** in lost food."

Bartley Davis,
Boy Scouts of America

“Once you've got it set up, you pretty much just let it go and let it run. **I'm more at ease now** that I'm going to know before everything goes bad."

Carrie Morfino
Food Service Director
Northville Public Schools

Streamling School Systems Nationwide

Northern Ohio School District

About
Serving 2,300 students across five buildings, the district's nutrition program is essential for ensuring students receive quality meals, particularly in an economically challenged area.

Challenge
A northern Ohio school district struggled with aging freezers, frequent power outages, and human errors, leading to costly food losses and compliance concerns.

Solution
Sonicu's wireless temperature monitoring system provided real-time alerts and mobile access, allowing staff to monitor freezers remotely and prevent losses. The system helped automate compliance reporting and was selected since Sonicu was a vendor of district's HPS Group Purchasing Organization.

"I'm always nervous when anything approaches 43 degrees as that's where bacteria start to grow . . . Having all of my team with the app and **knowing we have so many eyes on our aging freezers makes me so much more confident** we're not near that line."

We're an HPS Partner

Peace of Mind is Just a Call Away

2.5 Million Labor Hours Saved with Automated Solutions

$375M Worth of Assets Saved with SMART Alarms

99.99% Uptime with Sonicu Technology & Redundancy

Sonicu streamlines compliance documentation, report generation, alarm management, and all environmental monitoring under the same platform.

Our system combines wireless sensors, automated data logging, and built-in redundancy to deliver uninterrupted oversight of your district 24/7.

With over a decade of industry experience, we have the knowledge and hardware necessary to best protect your food supply while keeping facilities compliant with HACCP, FDA, and state regulations.

- **Your Network, Your Way:** Choose LTE, or the SoniLink Hub for secure, reliable connectivity. LTE failover also available for backup connectivity during primary network outages.
- **Intuitive Dashboards:** Our customizable views align with your workflow, with real-time insights accessible from any web-based device.
- **Compliance Made Easy:** With both automated and on-demand report generation built into our software, you'll always be ready for your next inspection.
- **Intelligent Alert Routing:** Our SMART Alarm Handler holds teams accountable with multiple alert methods, tiered escalation, and repeating alarm features.
- **Scalable System:** Our platform adapts as your business needs change without missing a beat.
