

SCHOOL DISTRICTS WITH SONICU SEE IMMEDIATE ROI

Food prices keep climbing. Labor costs continue to rise. And there's not enough staff to go around. It's never been more crucial to make the most of limited time, personnel, and resources.

Sonicu helps nutrition directors prevent food spoilage, eliminate manual data logging, and fully automate compliance documentation with a monitoring solution that is affordable and meets student nutrition safety requirements.

The Average K-12 District

Manages 5 schools per district

Oversees 20+ fridges, freezers,
and walk-in coolers

Each cold storage unit holds
about \$5k-\$10k worth of food

Districts with Sonicu

Review conditions across all
schools under one platform

Collect data 24/7, even during an
outage, with automatic DataSync
following reconnection

Purchased system for \$4,100,
and pay \$2,125 per year
(pays for itself after just 1 excursion)

Plug-and-Play Architecture

Sonicu's hardware connects seamlessly via Cellular connectivity (Ethernet available).

The device requires no passwords or configuration. Just plug it in, and it starts working right away.

100% Wireless Data Monitoring

Sonicu wireless sensors are rugged, install in seconds, and automatically transmit data to the Hub.

- Ambient temperature and humidity capture
- Cold storage with ranges from -30° to 60°C
- DataSync ensures no gaps in data from an outage
- AA Lithium-ion batteries included (2-year battery life)
- Simple peel-and-stick or zip-tie installation
- IP-67 Rating

Better than Wi-Fi

- Cellular connectivity hubs ready for deployment without IT intervention
- Zero-touch configuration makes installation simple
- Up to 500 sensors supported by a single hub
