

Essential Monitoring Platform for Operating Rooms

SONICU™
Monitoring. Measured.

Operating rooms run on three non-negotiables: continuous monitoring, documentation, and 24/7 audit-readiness.

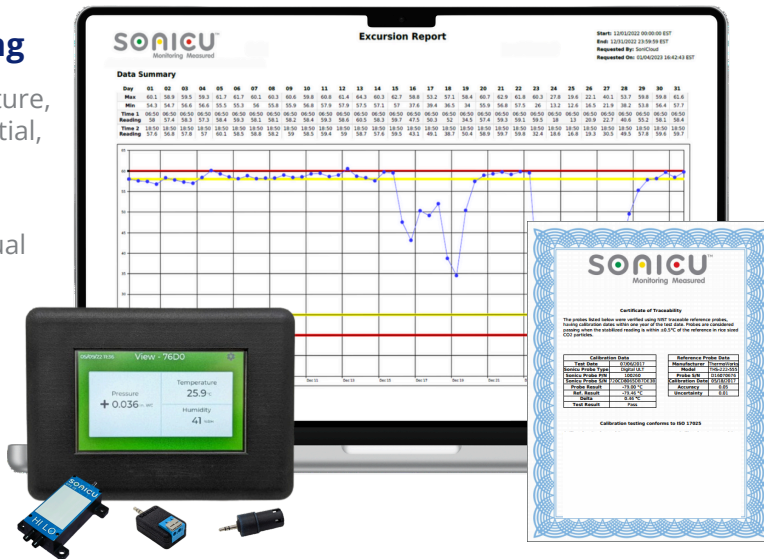

Sonicu meets all three demands with a single cloud-based platform that's built for compliance, quick to deploy, and easy to scale.

TEMPERATURE • HUMIDITY • DIFFERENTIAL PRESSURE

Real-Time OR Monitoring

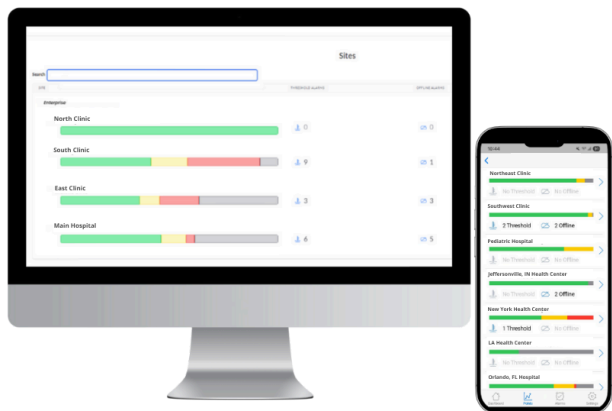

- Continuously logs temperature, humidity, pressure differential, and door status
- Eye-catching red/green LED touchscreen provides a visual alert for nearby personnel
- Meters transmit data wirelessly to Sonicu's platform
- Built-in data recovery features keep data trails complete and consistent

Compliance Made Easy

- Fully automated, audit-ready reports sent to your email
- Reports include alarm history and time-stamped corrective actions
- Digital Calibration Certificates upload on the platform automatically
- Certificates and configurations auto-update in the system after probe replacements

System-Wide Visibility

- Instant Alerts sent via text, phone call, email, or app notification
- Remote Access 24/7 from a smartphone, tablet, or PC
- See all locations at a glance in Enterprise View; zoom into individual sites for deeper context
- Assign teams to only see and receive alerts only for their own departments to ensure swift corrective action

BEST-SELLING MONITORING SOLUTIONS

SoniShield View

Differential Pressure
SKU: 114600

Door Status
SKU: CCI-1

Temp & Humidity
SKU: 114100

Cleanroom Monitoring Kit

- Real-time display works like a magnetic gauge, except it automatically sends data to the cloud
- Pressure Differential, Door Status, Temperature, and Humidity all shown in real-time on one screen
- Multi-View Panel Box available to save space, one panel holds up to four Views

SoniShield Duo

Glycol-Buffered Sensor
SKU: 100234

SoniShield Display (sold separately)

Warm-Buffered Sensor
SKU: 101279

Temperature Monitoring Kit

- The SoniShield Duo has three built-in redundancy features to protect your data during network and power outages
- Automates monitoring for fridges, freezers, incubators, warmers, and ambient air conditions
- Optional Bluetooth Display provides a visual for real-time readings collected from the Duo

SoniLink Hub (required)

Wireless Warm Environment Sensor
SKU: S-WE

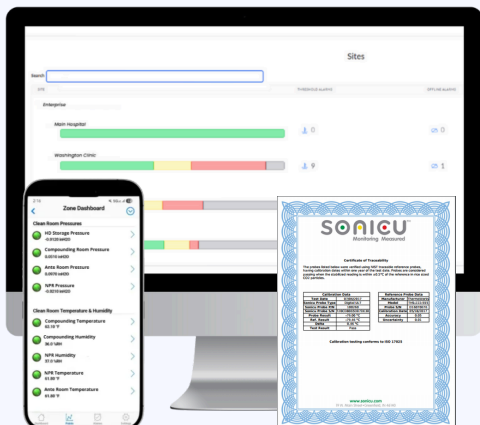

Wireless Door Contact Sensor
SKU: S-M02

Warm Environment Monitoring

- Wireless monitoring for warming cabinets; installs in seconds without tools
- Automatic data recovery feature continues monitoring during outages and fills data gaps when connectivity is restored

Door Monitoring

- Wirelessly tracks door status in real-time, delivering additional context to excursions caused by frequent door swings

Full Access to Sonicu's Platform

All Sonicu monitoring solutions include access to SoniCloud, a modern, scalable platform featuring continuous data logging, automated compliance reports, digital calibration certificates, and an auto-recalibration process.

Build on Your Existing Investments

Sonicu delivers the tools and scalability required for regulated environments, extending the value of your existing infrastructure with compliance-grade monitoring. Contact us to learn more.
