

Protect Inventory. Save Money. Breeze Through Inspections.

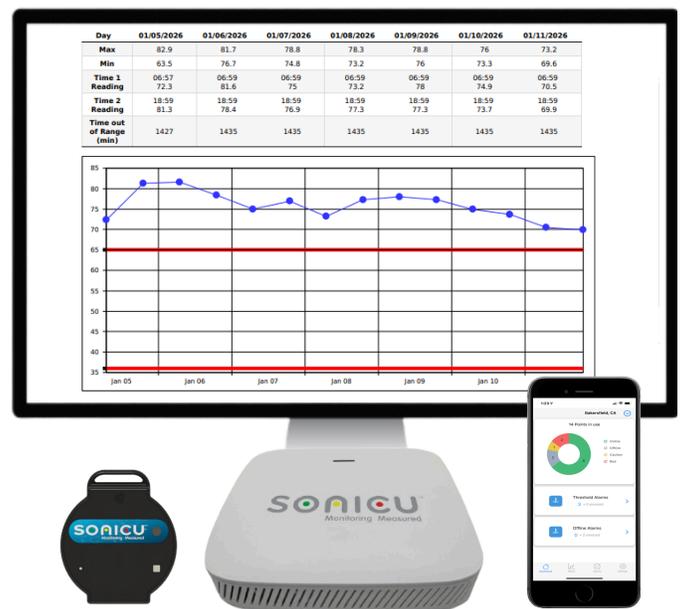

Prices are up, regulation rules keep changing, and there's never enough time to stay inspection-ready while managing cold storage temperature logs.

The **average cafeteria fridge stores around \$10k worth of food**. One honest mistake could cost thousands in asset loss.

With Sonicu, school districts have access to a **modern, user-friendly platform** that combines temperature logs, asset monitoring, and compliance **documentation on one dashboard**. This cuts labor costs, keeps programs audit-ready, and helps schools better protect their inventory.

Best of all? The cost of **Sonicu's solution**, both upfront and annually, is **less than the potential loss from a single missed temperature excursion**.

- Automated temperature logs sent to Sonicu's cloud-based data platform automatically
- 100% Wireless Monitoring – no more paper logs!
- Review alarms and real-time data anytime from your tablet, PC, or smartphone
- Audit-ready reports delivered to your inbox
- Battery-backup and DataSync feature ensures data protection during outages
- **HPS members get access to Sonicu's full system at an exclusive, pre-negotiated price.**

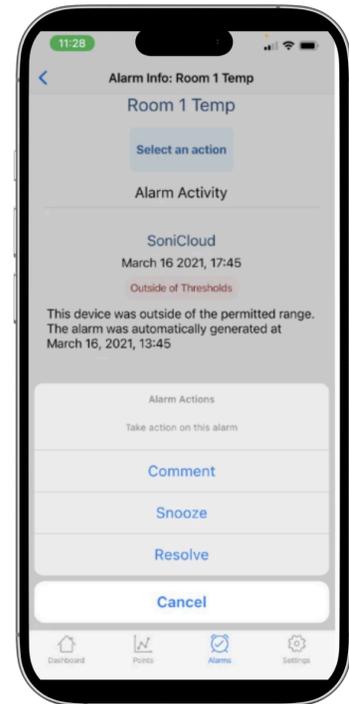

District-Wide Visibility

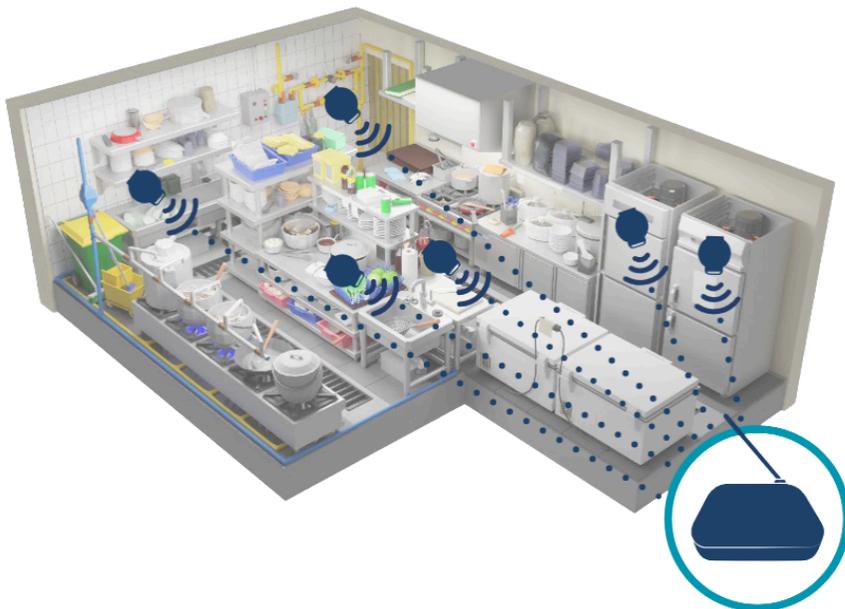

- See conditions across multiple locations on one page
- Zoom into individual sites for more details
- See departments in a grid or floorplan view

SMART Alarm Handler

- Real-time alerts sent via text, email, phone call, or push notification
- Leave a comment, snooze, or resolve alarms with the press of a button
- Alarm history and corrective actions are documented on every data report

Wire-Free Monitoring

- Deployment takes minutes – no IT needed
- Connects via Ethernet or cell signal – no Wi-Fi password needed
- Up to 500 sensors supported by a single hub
